CHECK

expert

**15 YEARS
GUARANTEE**
according to
guarantee conditions

Vinyl floors can now be glued with CHECK expert. A fully bonded CHECK expert dryback floor is more hard-wearing and resilient than a floating floor covering. This makes it particularly suitable for heavy, frequent use or stressed areas. The floors are dimensionally stable and do not move. A firm bond is partly required in the contact areas making CHECK the perfect choice.

The bonding also supports a great reduction in impact noise. The covering and underbody form a solid unit, which leads to a reduction in running noise. CHECK expert is also the optimum solution for warm water under-floor heating systems*, as the heat is particularly well conducted from the subfloor to the surface due to the full-surface connection. All CHECK expert floors are phthalate-free.

CHECK expert – the long-lasting option from the specialist for lasting enjoyment of the floor.

Construction

The CHECK expert vinyl floor consists of several layers, which are joined to form a plank during production. However, the click connection is not used here.

- 1 UV-coating
- 2 wear layer
- 3 decorative film
- 4 middle layer of virgin vinyl
- 5 return of virgin vinyl

Advantages CHECK expert

- ✓ suitable for damp rooms and residential conservatories*
- ✓ extraordinarily durable, robust and extremely long life
- ✓ very low construction height
- ✓ easy to clean
- ✓ warm underfoot, quiet and antistatic
- ✓ phthalat-free

*according to manufacturer approval

Connection

Bonding

Using this technique, the floor is glued over the entire surface using an adhesive. The individual planks are glued to the walls without tension and without joints. The manufacturer's instructions must be taken into account with regard to adhesive processing.

Format & special features

Format

Our floors are available in different formats and can be divided into four variants: planks, wide planks, tiles and XL tiles.

4-sided chamfer

A bevel is the slight bevelling of an edge. With a 4-sided chamfer, each individual plank is visually accentuated.

No grooves

Boards without grooves do not reveal any gaps, resulting in a smooth and harmonious appearance.
