

RECOMMENDED ADHESIVES AND SEALINGS

CHECK Real Stone

GENERAL INFORMATION

Before installation, make sure that the adhesive and the sealing is suitable for the intended application and the type of load. For questions or alternative solutions to adhesives and sealings, please contact the application technology of the respective adhesive manufacturer.

Adhesive and sealing recommendations may vary from country to country or continent to continent due to the composition of the adhesives, local climatic conditions and national installation regulations or standards.

Always carry out adhesion tests and preliminary tests.
